DETAILED ACTION

Drawings

New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because the submitted drawings are informal and of poor quality.

Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Numerous claims contains double inclusion of elements. For example, the phrases "a pull-up transistor" (claim 1, lines 2 and 4-5). It is suggested to amend said phrases to read --a first pull-up transistor-- and --a second pull-up transistor--, respectively.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 2824

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 and 7-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Itoh et al. (US Patent 5,668,770 hereafter "Itoh"). See for example Figs. 9, 17-18 and 21.

Note that phrases such as "to provide a forward body bias voltage to the bodies" is deemed to be functional language which does not carry any patentable weight. That is "to provide ..." is held to be functional:

Allowable Subject Matter

Claims 5 and 6 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

Claim 5 recites a memory cell with pull-up transistors having bodies forward biased, which features not found in prior art.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Yu et al. (US Pat. 5,394,026) describes a substrate bias generating circuit.

De et al. (US Pat. 6,232,827) describes transistors providing desired threshold voltages and reduced short channel effects with forward body bias.

De et al. (US Pat. 6,593,799) describes a circuit including forward body bias from supply voltage and ground nodes.
